ABOUT US

ProSys Contracting is one of the pioneers in implementing medical and scientific laboratory gas system projects at the highest level in the Kingdom of Saudi Arabia and has always been able to meet the needs of our valued customers.

Our eagerness to meet customers desires by providing them with internationally certified materials and equipment and by well-trained and experienced workforce is the basis of our success and progress in this field.

ProSys is a leading business group in supplying and installing medical gas pipeline equipment compliant with international approved standards

With over 30 years of experience in medical gas pipelines, ProSys identifies the advanced needs of its customers and embraces it to include all aspects of customer service to become a successful partner for the most famous manufacturers in Europe and Asia.

We have provided our services to over 50 medical facilities in the Kingdom and have equipped advanced scientific laboratories for many local universities in the Kingdom of Saudi Arabia as we keep pace with developments in our field of expertise to meet the needs of our customers.

VISION

To be distinguished project implementers in our areas of expertise to become preferred by valued-minded clients and to make the tasks of patient care staff and scientific laboratory staff in universities and institutes easy and accurate.

OUR SERVICES

Medical Gas Installation Services and Manifold Systems

Maintaining and Rehabilitation of Existing Medical Gas Systems

Installation of Medical Vacuum System and Medical Compressed Air Systems

Testing and Commissioning of Medical Gas Systems

Periodic Analysis of Medical Gas Outlets in Hospitals and Medical Facilities

Third-party for Testing and Commissioning Medical Gas Systems

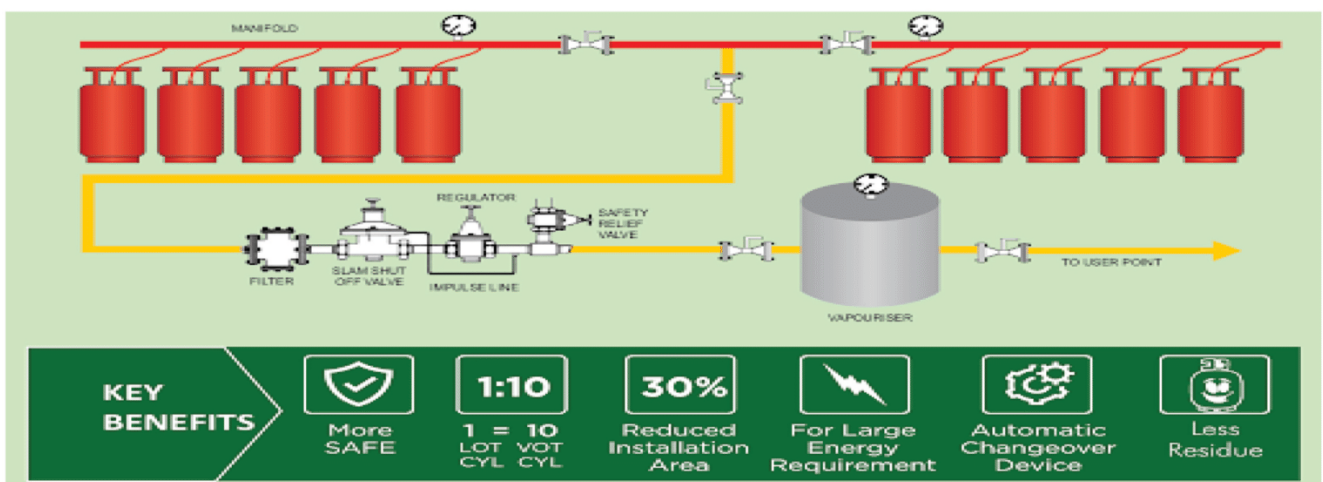

ACHIEVEMENTS

With our entry into the 2020 operating year, Process has achieved many achievements, the most important of which are:

- Twelve projects were closed as they were completed in the time agreed upon and with the approved specifications.
- Our technicians were qualified in accordance with the requirements of brazing code ASME-XI-2010.
- We have established a special department for LPG installation (Liquefied petroleum gas) for residential complexes, hotels and restaurants.
- Our activities have expanded to include gas system installation for scientific laboratories in universities and scientific research centers
